

Welcome to the Quick Reference Guide for the UK Medical Heritage Library Collection on Historical Texts Labs.

The [UK Medical Heritage Library \(UKMHL\)](#) holds more than 15 million pages in over 66,000 works from the 19th Century. Sporting full colour page images, PDF downloads and searchable OCR full text for all publications, The UKMHL collection is a valuable resource. The subject areas covered are broad and include topics such as consumer health, sport and fitness, food and nutrition as well as medicine and medical practices, providing a valuable resource for study in the medical humanities and beyond.

The “Visualising Medical History” sister-project has created powerful visualisation tools unique to the UKMHL collection, which researchers can use to search the content in new and hitherto untapped ways.

The UK Medical Heritage Library collection is the first open access collection for Historical Texts and it is currently hosted in a separate [“Labs”](#) area.

Historical Texts Labs has been created to enable researchers, students and teachers to test out and feedback on new features prior to their inclusion in the main service. The UK Medical Heritage Library collection is scheduled for integration into the main Historical Texts service in 2017, so it will then be cross-searchable alongside the EEBO, ECCO and the BL collections. There will also be a permanent open access portal for the collection.

The Quick Reference Guide will help users to get going on the UKMHL on Historical Texts Labs service as quickly as possible. It isn’t intended to cover every feature, or possible usage scenario. If you have any queries or require assistance please contact the Historical Texts helpdesk at historicaltexts@jisc.ac.uk .

A system of practical medicine (Volume 1) Author: Tweedie, Alexander, 1794-1884.

Putting the mouse over a tiled image causes the image to flip and show the parent publication title. Clicking on a tile opens this publication on the relevant page in the Viewer.

This is the Image Wall visualisation. It is accessible from this tab, along the top of your search results, here.

The images can be sorted Relevance, Date, Author or Title by clicking the drop-down arrow here.

The Image Wall shows a tiled display of all the illustrations from the publications in your search results.

The screenshot displays the 'Image Wall' feature of the Historical Texts interface. At the top, a navigation bar includes 'Home', 'About', 'Browse', 'Support', and 'My Texts', along with a search bar and a 'Search' button. Below the navigation bar, a filter section allows users to refine results by 'Printer/Publisher', 'Author', 'Date', 'Subject', 'Text type', 'Genre', and 'Collection'. The main area shows a grid of image tiles. A callout box explains that hovering over a tile shows the parent publication title and that clicking opens the relevant page in the Viewer. Another callout points to the 'Sort by' dropdown menu, which is currently set to 'Relevance'. A third callout indicates that the Image Wall shows a tiled display of all illustrations from the search results. The grid contains various medical illustrations, including anatomical drawings of the human body (e.g., a man's head, a man's torso, a man's arm) and book covers (e.g., 'A system of practical medicine (Volume 1)' by Tweedie, Alexander, 1794-1884).

Using the Viewer to look at a publication

Historical Texts << Results [Click here to return to your search results.](#)

Click the Search button to open the Search Panel for more options.

You can zoom in or out of the image, rotate in 90 degree steps and switch to a fullscreen view from this toolbar.

Click the numbered buttons to jump to the corresponding page, or use the arrow buttons to move a page at a time.

Click the Download Arrow icon here to see options for downloading the whole publication as a searchable PDF, a single page image as a JPEG, the full text of the publication in either ePub or plain text formats, or the bibliographic citation data for the publication in the .RIS format.

Click the Details button to open the Details Panel for more options.

Page images for the publication are shown here. You can click to zoom in, shift-click to zoom out, and click-and-drag to scroll the image around smoothly.

You can navigate forward and back through the publication, and toggle between a single or two-page view, using this toolbar.

PREPARATORY MOVEMENTS. 11

Hands on Hips. WITH hands on hips and feet apart and using the hips as the pivot, bend the trunk slightly backward with chest expanded, and then returning bend slightly forward and resume first position.

Feet apart—Trunk backwards and forwards bend.

NOTE.—If the movement is done with hands behind neck, take care to keep the elbows well back. In this position the movement is difficult.

Arm Stretchings—Forwards, Upwards, Sideways and Downwards. KEEPING the upper arms still, quickly bend upwards the fore arms as far as possible. Turn the wrists so that the tips of the fingers, which are together, slightly touch if possible the end of each shoulder. Keep the elbows against sides of chest and as far back as possible. This is the Arms Upward Bend position, and should be taken each time before the next arm stretching is done.

Practice this first.

Forward stretch front and side view. Upward stretch front and side view.

From the upward bend position suddenly shoot the arms out forwards, parallel to each other, and after a slight pause pull them to the upward bend position. Now shoot them up

Physical Culture FOR MEN, WOMEN AND CHILDREN
EASY METHOD OF ACQUIRING AND MAINTAINING PHYSICAL FITNESS WITHOUT APPARATUS, BY A FIFTEEN MINUTE EXERCISE.

Dedicatée TO MY TEACHER AND FRIEND HUAN BUOMAN, Esq., OK THE I'oyal (Syt)Iha, stic Cetvtral Iry, stitjite, Stockholm, «SW/cgch ; Late Orçjatizilig J'a-ster of Physical Exercise* to the «Skool Boarcj

has been generally admitted, the difficulty to the ordinary man and woman has been to discover a course of physical exercise which, without involving athletics or anything exhausting and fatiguing

would be at once sufficiently simple, thorough, and strengthening, as to restore and keep the system in general health. It is with a view to meet this difficulty that this course of Physical Exercise is

in any ordinary bedroom. They form part of the Ling-Swedish system of educational gymnastics, an important feature of which is the attention given to the physiological effect of each exercise. Such

with arms in upward stretch position grasp the bedstead, and so fix the arms and trunk. In this manner commence the lifting of the legs. Progress by performing the exercise with hands behind neck and

curved and bible back, and to exercise the upper part of the abdomen. These, with the Shoulder Blade Movements, will be found of special benefit to Cyclists, correcting the tendency to the so-called

MOVEMENTS PROPER. 17 In those cases where the bedstead rail is sufficiently strong the following exercise may be performed. Face the rail a short step away, stoop down, raise the arms backwards and

this exercise is found difficult to do, omit, for the I'nui View. Side View. present, until the shoulders have been rendered flexible enough b the Shoulder Blade Movements. Hands on With hands placed

moderate interval to intervene before breakfast. In cases of delicate constitution or ill-health, the exercise had better be deferred until two or three hours after breakfast, when the system is

sufficiently vigorous to meet it. In no case should exercise be taken immediately after a meal. In stating the movements, and in describing the manner in which they should be performed, I have endeavoured to

exercise in itself, bringing into play and thus strengthening the muscles of the parts affected. Those movements which may be omitted are so designated. All constricted clothing round the waist should

felt want, for it frequently happens that patients present themselves in the consulting room to whom a comprehensive form of physical exercise is of more importance than
